

Computing

# Lesson number 2: Selecting search results

**Computing systems and networks - Communication**

Jane Adamson

# Task 1 - Indexing

Complete the table on the right hand side of the slide.

In the second column write the steps you would go through in the correct order to search for a keyword in a book using an index.

In the third column write the steps you would go through to search for a keyword using the internet

Include words such as keyword, search engine and weblink.

<b>Step</b>	<b>Searching using a book</b>	<b>Searching using the internet</b>
Step 1	Identify your keyword(s)	Identify your keyword(s)
Step 2		
Step 3		
Step 4		
Step 5		

# Task 2 - Indexing in the kitchen

Pick 5 items that you can find in your kitchen and list them in the item column. Then write down where you find those items in the kitchen (they may be in more than one place)

Item	Location (s) in the kitchen
Cutlery	Dishwasher Sink table

# Task 3 - Narrowing a search

You will need to do three internet searches using the same search engine.

1. Search for dog, write down the number of results.
2. Search for for black dog
3. Search for black labrador

Take care to write the exact number of search results.

<b>Search term</b>	<b>Number of search results</b>
Dog	
Black dog	
Black Labrador
