# Applying rounding to estimate (subtraction)

Miss Brinkworth

## Part A

Round these numbers to the nearest 10

75	49	978	319	680	256	121
----	----	-----	-----	-----	-----	-----

## Challenge-

Which is the odd one odd?

Why?

## Part B

Use rounding to estimate the answer to these questions

$59 - 32 =$

$41 - 25 =$

$211 - 52 =$

$102 - 69 =$

$324 - 25 =$

$678 - 151 =$

Challenge-  $102 - 58 =$

Look at these ideas.

Decide which is best and why

I will round 58 to 60, this will be easier to subtract ( $102 - 60$ )

I will round 102 to 100 because this is easier to use ( $100 - 58 =$ )
