A number story...

A postal worker has some letters to post.
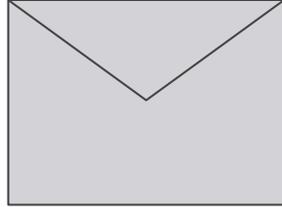

A number story...

The postal worker wants to match the numbers on the envelopes to the correct houses.

Can you help?

| **Count out objects** |
|:---:|
| **Place your house pictures with the numerals in order from 1-5**

Match the numerals on the envelopes to the numerals on the houses.

Place the envelopes in a line under the correct house. |

Which house has more post, 2 or 5?
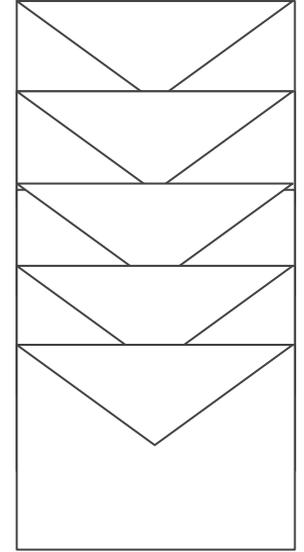

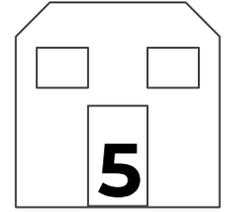

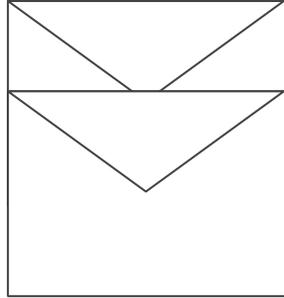

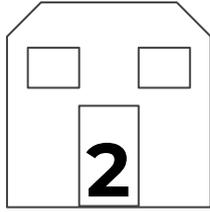

# Which house has more post, 1 or 4?

1

4
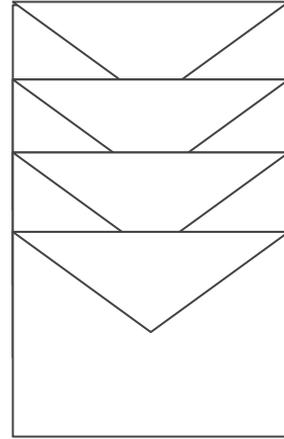

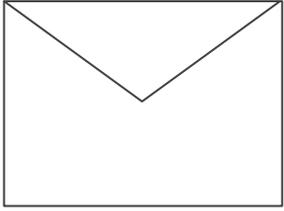

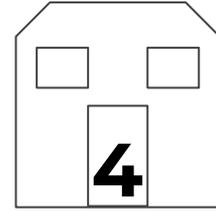

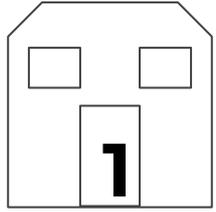

Which house has less post, 2 or 4?
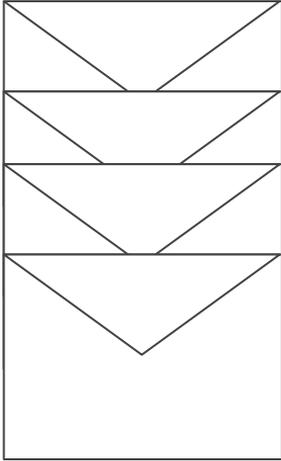

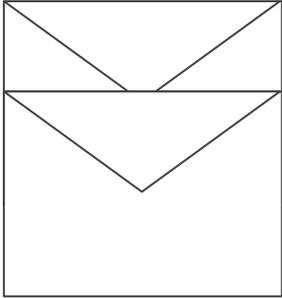

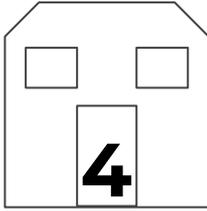

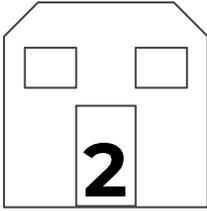

Which house has less post, 3 or 5?

3

5
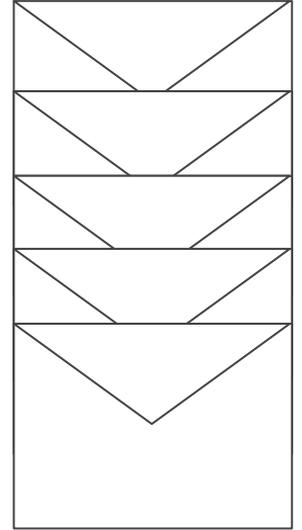

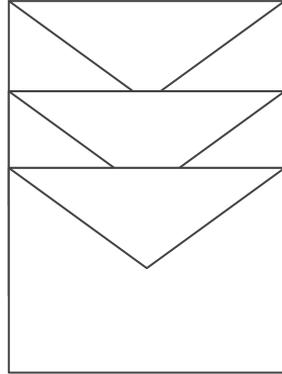

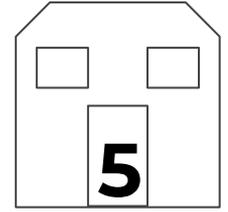

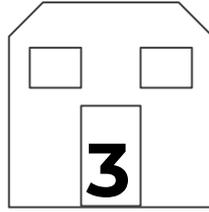

Which house has more post, 1 or 5?
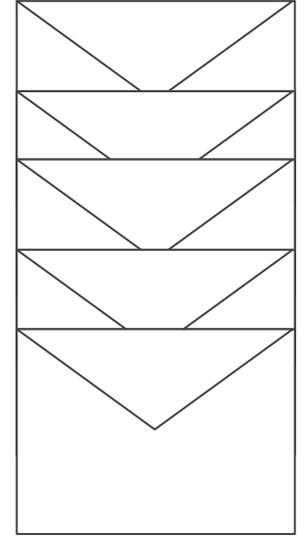

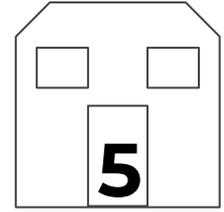

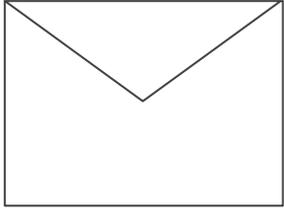

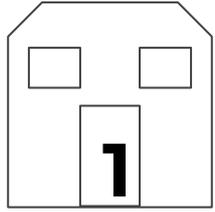

Which house has less post, 4 or 5?
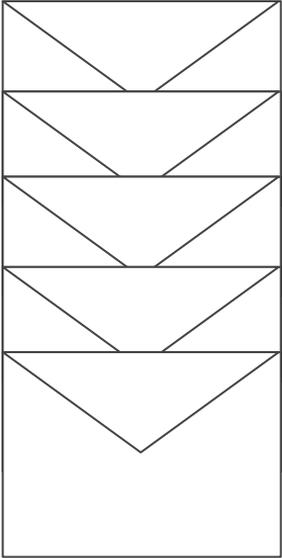

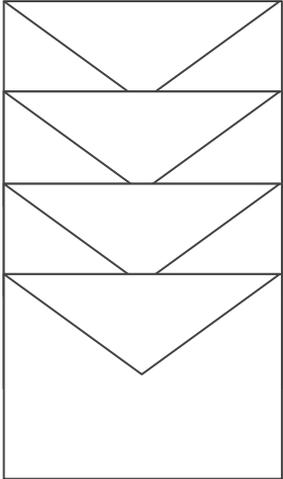

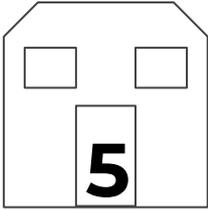

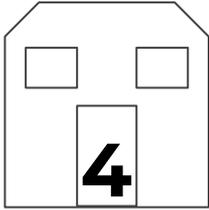

Numeracy: Number - Building Understanding
Lesson 4: Reinforcement of number unit

Make it easier

- Use 3 houses with numerals 1-3 on the houses and envelopes.
- When comparing the number of envelopes, place each envelope against a number line to guide your counting.

Numeracy: Number - Building Understanding
Lesson 4: Comparing groups of objects

Make it harder

- Choose 1 house and identify a house that has more post and a house that has less post.
- Is this possible for all 5 houses?
- Choose 3 houses and compare the number of envelopes with each house - which has more/less?

Numeracy: Number - Building Understanding
Lesson 4: Comparing groups of objects

More ideas

- Label 5 bowls each with a numeral 1-5 and place in order.
- Count out the correct number of sweets into each bowl to match the numeral.
- Choose 2 bowls and compare the number of sweets in each bowl - which has more/less?
