Computing

Lesson 1: Exploring Conditions

Selection in Quizzes

Josh Crossman

Task 1 - Using selection

Open ncce.io/p5b1-1

Look at the code snippets.

- What selection is taking place?
- What conditions are being carried out?
- What actions are being carried out if the conditions are true?

Credit: Scratch

Task 2 - Conditions in programs

Open ncce.io/p5b1-2

Run the program and explore how the conditions have been used for each code snippet.

Record your findings for each code snippet using the table structure on the next slide.

Task 2 - Conditions in programs

	What is the condition?	What happens when the condition is true?
A		
B		
C		

Task 3 - Modifying conditions

Open ncce.io/p5b1-3

Change the condition for both code snippets.

Run the program to check that the action is carried out when the new condition is true.
