Integer Addition and Subtraction: Adding and subtracting using multiples of 10, 100, 1000, 10 000 and 100 000

Ms Jeremy

Can you use the derived facts and 'Make 10' strategies to solve…?

36 000 + 5000 =

If I know that 7 + 11 = 18 what else do I know?

Independent Task

1. Use the 'derived facts' or 'Make 10' strategies to solve the following:

a) 17 000 + 6000 =

b) 280 000 + 120 000 =

c) 36 000 - 8000 =

2. If I know that '15 + 4 = 19', what else do I know?

3. 210 000 people attend an event over the weekend. 80 000 attended on Saturday. How many attended on Sunday?
