Absorption

(Downloadable student document)

Mr Humphries

OAK
NATIONAL
ACADEMY

*Food molecules need to
be _____ into the
blood.*

*Food molecules are
absorbed into the blood
at the _____
_____.*

*Large food molecules
need to be broken down
so they can be absorbed
into the _____.*

Independent Task

Answer the questions:

- 1. Give three adaptations of the small intestine (3)**

- 2. Explain how thin walls increase the rate of food absorption in the small intestine (2)**
